

stop acta

why you should...

ACTA is the "Anti Counterfeiting Trade Agreement":
an international treaty that is about controlling
music, film, books and medicines.

Europe is about to decide if we join.

ACTA threatens
your privacy and freedom of
speech. It will push private companies
to **police the Internet**. It will give them
more control over what you do online. This
could mean more snooping on your Internet
browsing, and would make it harder for
websites like YouTube to exist.

ACTA has
no democratic credibility.
It was written by a cabal of
bureaucrats behind closed doors.
They have repeatedly tried to deny
us a say in how our Internet
works.

ACTA will
hurt developing countries.
Charities such as Oxfam have
complained that it will make it harder
for developing countries to access
life-saving generic medicines.

stop acta

...and how you can

Tell your MEP to reject ACTA:

The European Parliament will vote on ACTA in June.
That means you finally have a say.

So find out who your MEP is. And tell them what's wrong.
Be friendly – they're considering ACTA, not responsible for it!

Find your MEP here: www.writetothem.com
